

Axygen® MultiRack Tip System

The Axxygen MultiRack tip system has been engineered to fit most of the pipettors in the market. It is an interchangeable, complete system offered in bulk, racked, filter, and reload packaging styles to meet the variety of needs in the lab setting. The MultiRack tip system offers standard and extended-length tips allowing volumes from 0.1 μL to 1250 μL . For racked and reload packaging styles, the tips are pre-loaded into easy-load, color-coded deck inserts. With a small benchtop footprint and reusable rack, this system minimizes environmental impact and lab space. Axxygen MultiRack tip system products are made in the USA and meet ISO standards. All tips are free of detectable RNase, DNase, DNA, and pyrogens.

Features

- ▶ Reusable rack with reload systems
- ▶ Small footprint and stackable design for maximum bench space usage
- ▶ Extended tips offered in 10, 200, 300, and 1000 μL sizes
- ▶ Color-coded racks for easy volume identification

Ordering Information

Axygen® MultiRack Pipet Tips

Axygen MultiRack Pipet Tips are supplied in convenient hinged racks that help reduce airborne contamination of the tips during use. Each rack is individually sealed. The high-quality polypropylene racks are reusable and fully autoclavable. The transparent rack and color-coded decks allow easy size identification. They can be refilled with Axxygen MultiRack reload systems to save both money and plastic.

Axygen MultiRack Reload System

Axygen MultiRack Reload System is designed to fit the Axxygen MultiRack System without tedious re-alignment. This design not only saves lab space but also reduces environmental impact. Sturdy racks resist accidental tipping, and the easy-close lid lock prevents tips from falling out of the rack while closed.

Axygen® MultiRack Maxymum Recovery® Pipet Tips

Axygen Maxymum Recovery technology creates a hydrophobic surface to improve accuracy and precision while reducing surface tension and sample wastage. They are specially designed for lab applications that demand complete release of a liquid solution, such as low concentration DNA, selected protein, and viscous liquids (glycerin, Triton-X™, etc.). Axygen MultiRack pipet tips with Maxymum Recovery surface are available in a wide range of tip sizes with filters and sterilization.
