***PRODUCT SELECTION GUIDE***

*Pacific Laboratory Products is a proudly owned Australian company with over 10 years of experience supplying a wide range of instrumentation and consumables to laboratories throughout Australia and New Zealand. High levels of experience make PLP the preferred partner when customers, from a wide range of industries, are in need of an in-depth solution.*

*At Pacific Laboratory Products, we are focused on understanding our customer's needs and the differences existing from laboratory to laboratory. Our knowledge based on experience ensures that all enquiries are handled with confidence ensuring that the supply of products is both fast and reliable. This in turn assists the end user in improving their workflow even for the most difficult to find products.*

*This product guide showcases a selected range of safety products commonly found in Life Science applications as well as Analytical and Industrial sectors. For detailed information and pricing, please contact a sales representative at: [sales@pacificlab.com.au](mailto:sales@pacificlab.com.au)*

**CHEMICAL PROTECTION**

Gloves, Chemical Resistant

The MaxiChem® Cut TM 3 offers similar features as the MaxiChem® plus the CutTech Technology for extra protection. Ideal for those working with chemicals requiring longer and higher levels of protection. Available in S,M,L and XL sizes

Super light seamless knit liner provides excellent comfort, sensitivity, fit and dexterity. Locking Cuff ensures the glove does not slip off the hand. Features a cuff covering area of approx. 30cm length.

The Micro-Cup Non-Slip grip finish allows for a controlled and superior grip in oily and wet applications. The Non-Slip Grip is only applied where it is actually needed - in the palm area - to ensure flexibility isn't compromised.

LIQUID REPELLENCE - Splash resistance to liquids is delivered through the LiquiTech® technology platform.

**MaxiChem Cut Level 3 Chem Resistant Gloves**

[Shop](#)

Code No: 56-633- (7, 8, 9, 10)  
Unit: Pair  
Qty: Each

INNOVATIVE FIBRES - ATG sources their own ingredients to develop their own unique high performance yarns and fibres that offer cut protection whilst maintaining high levels of comfort.

The MaxiChem gloves are suitable for temperatures up to 100°C, making this glove a great solution for unloading autoclaves among other uses.

## Gloves, Chemical Resistant

The MaxiChem® range was developed for those working with chemicals requiring longer and higher levels of protection. MaxiChem® is tested and certified according to EN 374-3.

**LIQUItech**  
LIQUID REPELLENCE - Splash resistance to liquids is delivered through the LiquiTech® technology platform.

The Micro-Cup Non-Slip grip finish allows for a controlled and superior grip in oily and wet applications. The Non-Slip Grip is only applied where it is actually needed - in the palm area - to ensure flexibility isn't compromised.

Super light seamless knit liner provides excellent comfort, sensitivity, fit and dexterity. Locking Cuff ensures the glove does not slip off the hand. Features a cuff covering area of approx. 30cm length.

### MaxiChem, 35cm Cuff [Shop](#)

Chem + Heat Resistant Gloves  
Code No: 56-635- (7, 8, 9, 10)  
Unit: Pair  
Qty: Each

The MaxiChem gloves are suitable for temperatures up to 100°C, making this glove a great solution for unloading autoclaves among other uses.

Best used in applications where chemical handling is involved, including and not limited to use in laboratories, industrial environments, food manufacturing, processing plants, water analysis, bottling, wineries and others.

## Gloves, Cold + Cut Resistant

The MaxiDry® Zero™ integrates the core values of the MaxiDry® brand to bring comfort and liquid repellence together and combine them with THERMtech® technology platform to offer thermal resistance inside with a coating designed for temperature up to -30°C.

**OPTIMIZED GRIP** - The Micro-Cup Non-Slip grip finish allows for a controlled and superior grip in wet and dry conditions. The non-slip grip is only applied where it is actually needed - in the palm area - to ensure flexibility isn't compromised.

Splash resistance to liquids is delivered through the LiquiTech® technology platform. Excellent resistance to hydrocarbons and caustics. The MaxiDry® Zero™ gloves are 100% waterproof coated.

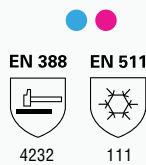

ThermTech® combines coating and seamless knitting technologies that impart thermal insulation properties to resist cold.

**SUPER SOFT AND SUPER FLEXIBLE COATING** - Providing ultimate flexibility even in extremely cold environments allowing you to channel energy into the heating of rather than the moving of your hand. Insulation liner is bonded away from the flex and movement points of your hands i.e. knuckles, to ensure ultimate comfort.

### MaxiDry Zero [Shop](#)

Freezer Gloves, Up to -30°C  
Code No: 56-451- (7, 8, 9, 10)  
Unit: Pair  
Qty: Each

ATG® has in-house state of the art facilities to blend cold resistant yarns and fibres to produce products with high thermal insulation properties, without sacrificing flexibility, dexterity, weight and comfort.

The MaxiCut LP Gloves are ideal for handling hot objects

Commonly used in Life Science applications

## Gloves, Cut, Heat & Stab Resistant

Developed as a Heat + Cut resistant glove, the MaxiCut® LP combines cut protection with heat protection. The MaxiCut® LP offers excellent liquid repellent properties, oil grip, comfort, flexibility and dexterity. These Gloves are commonly used in laboratories for autoclave sterilization or any handling of hot objects.

### CUTtech®

**INNOVATIVE FIBRES** - ATG sources their own ingredients to develop their own unique high performance yarns and fibres that offer cut protection whilst maintaining high levels of comfort.

**REINFORCEMENT** - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.

### THERMtech®

Accredited with the EN407 standard rating of 2 for resistance to contact heat, the protection is based primarily around the palm area, providing a delay in heat transfer for superior protection while improving handling time.

To be marked with class 2, the glove's inside material must manage 250°C heat for 15 seconds before the material exceeds 35°C.

#### MaxiCut Leather Palm Cut + Heat Resistant Gloves, Cut Level 3

Code No: 34-450LP- (7, 8, 9, 10)

Unit: Pair

Qty: Each

### GRIPtech®

**OPTIMIZED GRIP** - A leather Non-Slip coat allows for a controlled and superior grip in hot or oily applications. The Non-Slip grip is only applied where it is actually needed - in the palm area - to ensure that flexibility is not compromised.

End users have been requesting a cut resistant MaxiFlex® glove that's still super thin, flexible, dexterous and comfortable. It is now available, it is called it MaxiCut® 5 Ultra!

### DURAtech®

MaxiCut® 5 Ultra has outstanding durability withstanding 18,000 abrasive cycles thanks to the use of the DuraTech® coating technology in the coating construction. The MaxiCut® 5 Ultra has greater resistance when compared to other gloves in its class.

### AIRtech®

**360° BREATHABILITY** - patented micro-foam nitrile coating offers 360° breathability, making it the most breathable glove on the market today. AirTech® is the standard for breathability, developed to enhance comfort by eliminating heat build up inside the glove.

#### MaxiCut 5 Ultra Cut+Stab Resistant Gloves, Cut Level 5

Code No: 44-3745- (6, 7, 8, 9, 10, 11)(XS to XXL)

Unit: Pair

Qty: Each

EN 388

4542

Commonly found in laboratories, food processing plants, abattoirs, hospitals, mortuary facilities or generally any applications where sharp objects are involved.

Developed as a breathable cut resistant glove, the MaxiCut® 5 Liner combines cut protection with comfort, flexibility and dexterity for dry environments.

### CUTtech®

Provides consistent levels of cut protection to a light, flexible and comfortable glove solution.

**INNOVATIVE FIBRES** - ATG source their own ingredients to develop their own unique high performance yarns and fibres that offer cut protection whilst maintaining high levels of comfort. **REINFORCEMENT** - Optimal cut resistance is transferred through ATG innovative yarns and fibres.

### ERGOtech®

**FORM, FIT AND FEEL** - mimics the "hand at rest", reducing hand fatigue and increasing comfort.

**LATEST KNITTING TECHNOLOGY** - utilized to produce a smooth and rounded fingertips, improving fingertip sensitivity.

**CONSISTENT PENETRATION FREE LINER** - from the nitrile, leaving only the soft liner resting against the skin i.e. no strike-through.

#### MaxiCut 5 Liner Cut+Resistant Gloves, Cut Level 5

Code No: 58-917- (7, 8, 9, 10)

Unit: Pair

Qty: Each

EN 388

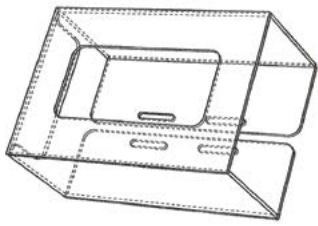

4541

Ideal to be used in general cutting or slicing laboratory applications. Due to their flexibility and dexterity properties, these gloves can be an alternative where a double layer of protection is required.

### AIRtech®

**360° BREATHABILITY** - patented micro-foam nitrile coating offers 360° breathability, making it the most breathable glove on the market today. AirTech® is the standard for breathability, developed to enhance comfort by eliminating heat build up inside the glove.
