

SuperSnap™

High Sensitivity ATP

SuperSnap is the most sensitive ATP test in Hygiena's line of ATP devices.

Designed to work with all Hygiena luminometers, SuperSnap detects extremely low levels of ATP. The test is used predominantly in food and beverage manufacturing where the highest standards of hygiene are required.

SuperSnap reagents are formulated for superior resistance to sanitizer effects, making it an ideal ATP test when dealing with harsh environments or difficult samples. By incorporating SuperSnap into a food safety program, risks and issues are recognized in real time so corrective action can be implemented before product change-overs occur.

Benefits

- Patented device design ensures maximum sample collection and recovery
 - More sensitive liquid stable reagent detects very small amounts of ATP
 - Robust reagent is resistant to sanitizer effects and temperature abuse
 - 100% recyclable plastic
 - 15 month shelf life at refrigerated temperatures (2-8°C) *
 - 4 week shelf life at room temperature (21-25°C) *
- (* From date of manufacturing).

Sensitivity

- 4 times more sensitive than UltraSnap Surface ATP Tests
- 100 times more sensitive than other systems on the market when used with EnSURE monitoring system
- 5 times more resistant to acid based sanitizers
- 10 times more resistant to alkali based sanitizers
